

Washington Flora Checklist

A checklist of the Vascular Plants of Washington State

Hosted by the University of Washington Herbarium

Family: Araliaceae

6 terminal taxa (species, subspecies, and varieties).

The Washington Flora Checklist aims to be a complete list of the native and naturalized vascular plants of Washington State, with current classifications, nomenclature and synonymy.

Taxa included in the checklist:

- * Native taxa whether extant, extirpated, or extinct.
- * Exotic taxa that are naturalized, escaped from cultivation, or persisting wild.
- * Waifs (e.g., ballast plants, escaped crop plants) and other scarcely collected exotics.
- * Interspecific hybrids that are frequent or self-maintaining.
- * Some unnamed taxa in the process of being described.

Family classifications follow [APG IV](#) for angiosperms, PPG I (J. Syst. Evol. 54:563?603. 2016.) for pteridophytes, and Christenhusz et al. (Phytotaxa 19:55?70. 2011.) for gymnosperms, with a few exceptions. Nomenclature and synonymy at the rank of genus and below follows the [2nd Edition of the Flora of the Pacific Northwest](#) except where superceded by new information.

Accepted names are indicated with blue font; synonyms with black font.
Native species and infraspecies are marked with **boldface** font.

Please note: This is a working checklist, continuously updated. Use it at your discretion.

Created from the Washington Flora Checklist Database on May 19th, 2024 at 11:19am PST.

Dicots:

Araliaceae [HC, HC2] Ginseng Family

Synonyms: (none)

References: (none)

Aralia [HC, HC2]

spikenard

Aralia nudicaulis L. [HC, HC2]

Sp. Pl. 1: 274.

wild sarsaparilla

Aralia nudicaulis L. var. *elongata* Nash

Aralia nudicaulis L. var. *prolifera* Apgar

Hedera [HC, HC2]

ivy

Hedera colchica (K. Koch) K. Koch [HC2]

Hedera helix L. [HC, HC2]

Sp. Pl. 1: 202.

common ivy, English ivy

(see also *Hedera hibernica*)

Hedera helix L. ssp. *helix* [Stace 1997]

The classification of *Hedera* is disputed, here we follow the taxonomy of Stace (1997). A weed in western Washington, but not as abundant as subsp. *hibernica* (Murai 1999; Jacobson 2001).

Hedera hibernica (G. Kirchn.) Bean [HC2]

Bon Jard. 1835: 731.

Atlantic ivy

Hedera helix L. ssp. *hibernica* (G. Kirchn.) D.C. McClint. [Stace 1997]

The taxonomy of *Hedera* is disputed, here we follow the taxonomy of Stace (1997). The subspecies are distinguished by the aspect and color of their stellate hairs, and to a lesser degree by the leaf lobing of sterile shoots. An abundant weed in western Washington (Murai 1999; Jacobson 2001). In the horticultural trade generally called CV \Hiber

Hydrocotyle [HC, HC2]

marsh-pennywort, water-pennywort

Hydrocotyle ranunculoides L. f. [HC, HC2, VPBC1]

Suppl. Pl. 177. [1782].

floating marsh-pennywort

Hydrocotyle cymbalarifolia Muhl.

Formerly placed in Apiaceae.

Oplopanax [HC, HC2]

Oplopanax horridum (Sm.) Miq. [HC2]

Ann. Mus. Bot. Lugduno-Batavum 1: 16.

devil's-club

Echinopanax horridum (Sm.) Dcne. & Planch

Echinopanax horridum (Sm.) Decne. & Planch. ex Harms [KZ99]

Fatsia horridum (Sm.) Benth & Hook. f. ex Brewer & S. Watson

Oplopanax horridum (Sm.) Miq. [HC]
Panax horridum (Sm.)
Ricinophyllum horridum Nelson & Macbr.
