

Flora of the Pacific Northwest Checklist

A checklist of the Vascular Plants of the Pacific Northwest Hosted by the University of Washington Herbarium

Family: Dipsacaceae

2 terminal taxa (species, subspecies, and varieties).

The Flora of the Pacific Northwest Checklist aims to be a complete list of the native and naturalized vascular plants of the Pacific Northwest, with current classifications, nomenclature and synonymy.

Taxa included in the checklist:

- Native taxa whether extant, extirpated, or extinct.
- Exotic taxa that are naturalized, escaped from cultivation, or persisting wild.
- Waifs (e.g., ballast plants, escaped crop plants) and other scarcely collected exotics.
- Interspecific hybrids that are frequent or self-maintaining.
- Some unnamed taxa in the process of being described.

Family classifications follow [APG IV](#) for angiosperms, PPG I (J. Syst. Evol. 54:563-603. 2016.) for pteridophytes, and Christenhusz et al. (Phytotaxa 19:55-70. 2011.) for gymnosperms, with a few exceptions. Nomenclature and synonymy at the rank of genus and below follows the [2nd Edition of the Flora of the Pacific Northwest](#) except where superseded by new information.

Accepted names are indicated with **blue type**, synonyms with **gray type**.

Native species and infraspecies are marked with **bold-face type**.

*Non-native and introduced taxa are preceded by an asterisk.

Please note: This is a working checklist, continuously updated. Use it at your discretion.

Dicots:

Dipsacaceae [HC, HC2] Teasel Family

**Dipsacus* [HC, HC2]

teasel

**Dipsacus fullonum* L. [FNA, JPM2]

Sp. Pl. 1: 97. 1753.

teasel

Dipsacus fullonum L. ssp. *sylvestris* (Huds.) Clapham

Dipsacus sylvestris Huds. [HC, HC2]

**Knautia* [HC, HC2]

scabiosa

**Knautia arvensis* (L.) Coult. [HC, HC2]

Mém. Dipsac., 41. 1823.

Bluebuttons

Scabiosa arvensis L.

Currently (2012) one known specimen from Western Washington University collected in 1969 in Port Townsend. It is not considered established in the flora.
