

# Washington Flora Checklist

## A checklist of the Vascular Plants of Washington State

### Hosted by the University of Washington Herbarium

#### Family: Aristolochiaceae

1 terminal taxa (species, subspecies, and varieties).

The Washington Flora Checklist aims to be a complete list of the native and naturalized vascular plants of Washington State, with current classifications, nomenclature and synonymy.

#### Taxa included in the checklist:

- Native taxa whether extant, extirpated, or extinct.
- Exotic taxa that are naturalized, escaped from cultivation, or persisting wild.
- Waifs (e.g., ballast plants, escaped crop plants) and other scarcely collected exotics.
- Interspecific hybrids that are frequent or self-maintaining.
- Some unnamed taxa in the process of being described.

Family classifications follow [APG IV](#) for angiosperms, PPG I (J. Syst. Evol. 54:563-603. 2016.) for pteridophytes, and Christenhusz et al. (Phytotaxa 19:55-70. 2011.) for gymnosperms, with a few exceptions. Nomenclature and synonymy at the rank of genus and below follows the [2nd Edition of the Flora of the Pacific Northwest](#) except where superceded by new information.

Accepted names are indicated with **blue type**, synonyms with gray type.

Native species and infraspecies are marked with **bold-face type**.

\*Non-native and introduced taxa are preceded by an asterisk.

**Please note:** This is a working checklist, continuously updated. Use it at your discretion.

## Dicots:

### Aristolochiaceae [FNA3, HC, HC2] Birthwort Family

#### ***Asarum* [FNA3, HC, HC2]**

Sp. Pl. 1: 442. 1753; Gen. Pl. ed. 5, 201, 1754.  
wild ginger

#### ***Asarum caudatum* Lindl. [FNA3, HC, HC2]**

Edwards's Bot. Reg. 17: footnote after plate 1399. 1831.  
wild ginger

*Asarum caudatum* Lindl. var. *caudatum* [KZ99]

FNA3: "In most populations of *Asarum caudatum* , the distal portion of the sepal is spreading or weakly reflexed and 30-75 mm. A single population south of Mt. Shasta, California, has the distal sepals strongly reflexed and unusually short, often as little as 1.1 cm. Flowers of these plants superficially resemble those of *A . lemmontii* ; they differ in being horizontal, not descending as in *A . lemmontii* , and in the filiform-attenuate sepals. Native Americans used *Asarum caudatum* medicinally to treat headaches, intestinal pain, knee pain, indigestion, boils, tuberculosis, and colic, and as a general tonic (D. E. Moerman 1986)."
