# **Washington Flora Checklist**

### A checklist of the Vascular Plants of Washington State Hosted by the University of Washington Herbarium

## Family: Plumbaginaceae

5 terminal taxa (species, subspecies, and varieties).

The Washington Flora Checklist aims to be a complete list of the native and naturalized vascular plants of Washington State, with current classifications, nomenclature and synonymy.

#### Taxa included in the checklist:

- Native taxa whether extant, extirpated, or extinct.
- · Exotic taxa that are naturalized, escaped from cultivation, or persisting wild.
- Waifs (e.g., ballast plants, escaped crop plants) and other scarcely collected exotics.
- Interspecific hybrids that are frequent or self-maintaining.
- Some unnamed taxa in the process of being described.

Family classifications follow <u>APG IV</u> for angiosperms, PPG I (J. Syst. Evol. 54:563-603. 2016.) for pteridophytes, and Christenhusz et al. (Phytotaxa 19:55-70. 2011.) for gymnosperms, with a few exceptions. Nomenclature and synonymy at the rank of genus and below follows the <u>2nd Edition of the Flora of the Pacific Northwest</u> except where superceded by new information.

Accepted names are indicated with blue type, synonyms with gray type. Native species and infraspecies are marked with **bold-face type**.

\*Non-native and introduced taxa are preceded by an asterisk.

Please note: This is a working checklist, continuously updated. Use it at your discretion.

### **Dicots:**

## Plumbaginaceae [FNA5, HC, HC2] Leadwort Family, Plumbago Family

### Armeria [FNA5, HC, HC2] Enum. Pl. 1: 333. 1809. sea-pink, thrift \*Armeria arenaria (Pers.) Schult. [HC2] Syst. Veg., ed. 15 bis [Roemer & Schultes] 6: 771. 1820. Jersey thrift Armeria maritima (Mill.) Willd. [FNA5, HC, HC2] Enum. Pl. 1: 333. 1809. sea-pink, thrift ssp. californica (Boiss.) A.E. Porsild [FNA5, HC2]

Bull. Natl. Mus. Canada. 135: 174. 1955.

sea-pink, thrift

Armeria andina Poepp. ex Boiss. var. californica Boiss.

Armeria arctica (Cham.) Wallr. ssp. californica (Boiss.) Abrams

Armeria maritima (Mill.) Willd. var. californica (Boiss.) G.H.M. Lawr. [HC]

Armeria maritima (Mill.) Willd. var. purpurea (W.D.J. Koch) G.H.M. Lawr. [HC], misapplied

FNA5: "In northern Washington and on Vancouver Island, populations with hairy leaves have been called Armeria maritima var. purpurea (Koch) G. H. M. Lawrence, a dimorphic-flowered taxon from central Europe. The American monomorphic-flowered specimens thought to belong to var. purpurea are not distinct from subsp. californica, except for their hairy leaves. We include hairy-leaved specimens in subsp. californica."

### \*ssp. maritima [FNA5, HC2]

Enum. Pl. 1: 333?334. 1809. sea-pink, thrift

### Limonium [FNA5, HC2]

Gard. Dict. Abr., ed. 4. vol. 2. 1754. [name conserved] sea lavender, marsh rosemary, statice

#### \*Limonium californicum (Boiss.) A. Heller [FNA5, HC2]

Cat. N. Amer. Pl., 6. 1898. western marsh-rosemary

Recently (2016) collected from a spreading population in a salt marsh in Whatcom County.

#### \*Limonium ramosissimum (Poir.) Maire [FNA5]

Bull. Soc. Hist. Nat. Afrique N. 27: 244. 1936. branched marsh-rosemary, branched sea-lavender
