

Washington Flora Checklist

A checklist of the Vascular Plants of Washington State Hosted by the University of Washington Herbarium

Family: Tamaricaceae

3 terminal taxa (species, subspecies, and varieties).

The Washington Flora Checklist aims to be a complete list of the native and naturalized vascular plants of Washington State, with current classifications, nomenclature and synonymy.

Taxa included in the checklist:

- Native taxa whether extant, extirpated, or extinct.
- Exotic taxa that are naturalized, escaped from cultivation, or persisting wild.
- Waifs (e.g., ballast plants, escaped crop plants) and other scarcely collected exotics.
- Interspecific hybrids that are frequent or self-maintaining.
- Some unnamed taxa in the process of being described.

Family classifications follow [APG IV](#) for angiosperms, PPG I (J. Syst. Evol. 54:563-603. 2016.) for pteridophytes, and Christenhusz et al. (Phytotaxa 19:55-70. 2011.) for gymnosperms, with a few exceptions. Nomenclature and synonymy at the rank of genus and below follows the [2nd Edition of the Flora of the Pacific Northwest](#) except where superseded by new information.

Accepted names are indicated with **blue type**, synonyms with **gray type**.

Native species and infraspecies are marked with **bold-face type**.

*Non-native and introduced taxa are preceded by an asterisk.

Please note: This is a working checklist, continuously updated. Use it at your discretion.

Dicots:

Tamaricaceae [HC, HC2] Tamarisk Family

**Tamarix* [HC, HC2]

saltcedar, tamarisk

**Tamarix chinensis* Lour. × *Tamarix ramosissima* Ledeb.

hybrid salt cedar, hybrid saltcedar, hybrid tamarisk

**Tamarix parviflora* DC. [HC, HC2, JPM2]

Prodr. 3: 97. 1828.

small-flower salt cedar, small-flower saltcedar, small-flower tamarisk

Tamarix tetrandra Pall. ex M. Bieb., misapplied

**Tamarix ramosissima* Ledeb. [HC2, JPM]

Fl. Altaic. 1: 424-426. 1829.

salt cedar, saltcedar, tamarisk

Tamarix pentandra Pall. [HC]

Tararix pentandra

Noxious in WA.
