

# Washington Flora Checklist

## A checklist of the Vascular Plants of Washington State

### Hosted by the University of Washington Herbarium

#### Family: **Woodsiaceae**

3 terminal taxa (species, subspecies, and varieties).

The Washington Flora Checklist aims to be a complete list of the native and naturalized vascular plants of Washington State, with current classifications, nomenclature and synonymy.

#### Taxa included in the checklist:

- Native taxa whether extant, extirpated, or extinct.
- Exotic taxa that are naturalized, escaped from cultivation, or persisting wild.
- Waifs (e.g., ballast plants, escaped crop plants) and other scarcely collected exotics.
- Interspecific hybrids that are frequent or self-maintaining.
- Some unnamed taxa in the process of being described.

Family classifications follow [APG IV](#) for angiosperms, PPG I (J. Syst. Evol. 54:563-603. 2016.) for pteridophytes, and Christenhusz et al. (Phytotaxa 19:55-70. 2011.) for gymnosperms, with a few exceptions. Nomenclature and synonymy at the rank of genus and below follows the [2nd Edition of the Flora of the Pacific Northwest](#) except where superseded by new information.

Accepted names are indicated with **blue type**, synonyms with **gray type**.

Native species and infraspecies are marked with **bold-face type**.

\*Non-native and introduced taxa are preceded by an asterisk.

**Please note:** This is a working checklist, continuously updated. Use it at your discretion.

Created from the Washington Flora Checklist database on July 12th, 2025 at 9:10am PT.

# Ferns and Lycophytes:

## Woodsiaceae [HC2] Cliff Fern Family

### *Woodsia* [FNA2, HC, HC2]

Prodr. 158. 1810.  
cliff-fern, woodsia

### *Woodsia oregana* D.C. Eaton [FNA2, HC, HC2]

Canad. Naturalist & Quart. J. Sci. n. s. 2: 90. 1865.  
Oregon cliff-fern, Oregon woodsia

### *ssp. oregana* [FNA2, HC2]

Canad. Naturalist & Quart. J. Sci. n. s. 2: 90. 1865.  
Oregon cliff-fern, western cliff-fern

FNA2: "The variability and promiscuity of *Woodsia oregana* have been major sources of taxonomic difficulties in *Woodsia*, and more work will be necessary before relationships in this complex are fully resolved. As defined here, *W. oregana* comprises two subspecies that are chromosomally and biochemically distinct. In addition, the two taxa are nearly allopatric, with the diploid (subsp. *oregana*) confined to the Pacific Northwest and the tetraploid (subsp. *cathcartiana*) extending from the southwestern United States to eastern Canada."

### *Woodsia scopulina* D.C. Eaton [FNA2, HC, HC2]

Canad. Naturalist & Quart. J. Sci. 2: 91. 1865.  
cliff-fern, woodsia

### *ssp. laurentiana* Windham [FNA2, HC2]

Contr. Univ. Michigan Herb. 19: 59. 1993.  
Laurentian cliff fern

### *ssp. scopulina* [FNA2, HC2]

Naturalist & Quart. J. Sci. 2: 91. 1865.  
Rocky Mountain cliff fern, mountain fern
